## MONTANA WELL LOG REPORT

This well log reports the activities of a licensed Montana well driller, serves as the official record of work done within the borehole and casing, and describes the amount of water encountered. This report is compiled electronically from the contents of the Ground Water Information Center (GWIC) database for this site. Acquiring water rights is the well owner's responsibility and is NOT accomplished by the filing of this report.

## Section 7: Well Test Data

Total Depth: 44 Static Water Level: 19 Water Temperature:

Air Test \*

20 gpm with drill stem set at \_ feet for 1 hours. Time of recovery \_ hours.

Recovery water level feet. Pumping water level 38 feet.

\* During the well test the discharge rate shall be as uniform as possible. This rate may or may not be the sustainable yield of the well. Sustainable yield does not include the reservoir of the well casing.
